LABORATORY REPORT

Patient Name:	Webb, Marcus	Date of Birth:	03/15/1968
Ordering Physician:	Dr. Elena Vasquez NPI: 1558423670	Specimen Received:	09/29/2025
Accession #:	MCL-20250929-4471	Report Date:	10/01/2025

TEST NAME	RESULT	REFERENCE RANGE	UNITS	FLAG
Immunoglobulin G (IgG)	285	700 – 1600	mg/dL	LOW ▼

Specimen type: Serum. Method: Nephelometry.
This result has been reviewed and released by a licensed laboratory director.

INTERPRETATION NOTE

Serum IgG of 285 mg/dL is markedly below the lower limit of the reference range (700 mg/dL). This finding is consistent with significant hypogammaglobulinemia. Correlation with clinical history and additional immunologic workup is recommended. Results should be interpreted in conjunction with the ordering physician's clinical assessment.
